# Stronger, Secure and Durable Doors

## Strong and Secure, With Little Maintenance

The **Stellar Doors™** entrance range creates a warm welcome for your home that will really last. That's because **Stellar Doors™** are made from aluminium. They're stronger than timber. They won't split, warp or leak, so there's little maintenance required. **Stellar Doors™** are designed to last. And because they're structurally stronger than conventional doors, **Stellar Doors™** provide you with more security.

## Thermally Broken Doors

**Stellar Doors™** are available as thermally enhanced to provide greater insulation for your home. Thermally enhanced doors do not conduct as much heat or cold between the interior and exterior (resulting in unwanted heat loss or gain) as standard aluminium entrance doors. Match this format with your Southern41™ Thermal joinery.

## Lasting Elegance

The powder coat finish gives you a door that lasts, in the style you want. Whether you're after a traditional look, or perhaps something more contemporary, you can choose a **Stellar Doors™** to suit. The range of finishes also includes a wood grain that gives you all the warmth and beauty of timber with the durability of aluminium. All of our surface coatings come with a minimum industry leading 15 year warranty.

# Because First Impressions Count

## Create The Look You Want

With **Stellar Doors™**, you can create an entrance that is unique.

Configurations include single, double and door & a half. All doors shown below are available in non thermal and thermally broken options.

## Options are only limited by your Imagination

Each of the options on the right can be configured in multiple ways. Discuss your preferred option with your local fabricator.

- Single Doors
- Double Doors
- Door & a half
- Sidelights
- Overlights
- Custom-made
- Thermally Broken
- Colours and Finishes

# Single Door

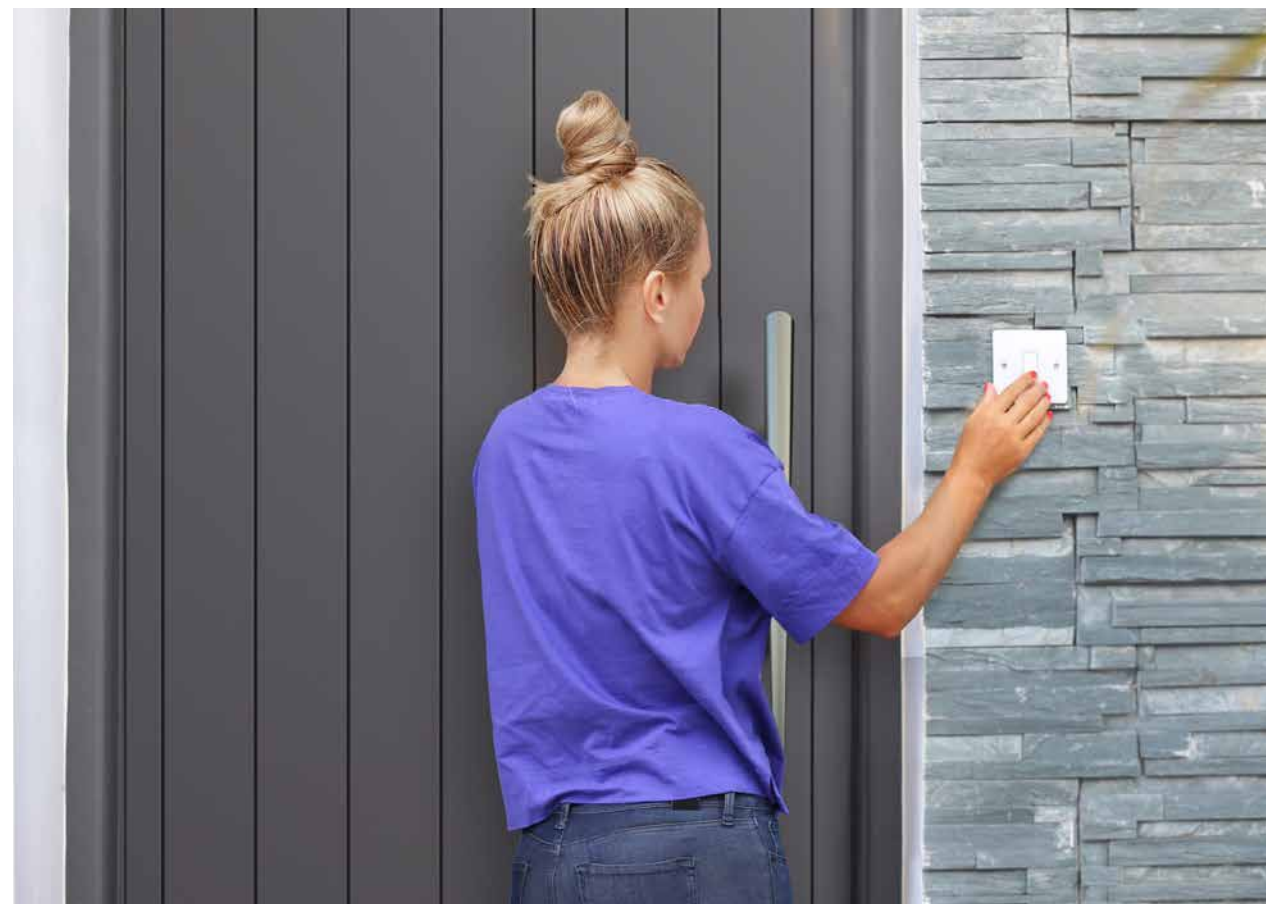

Single entrance doors are common for many homes.

They provide an enticing approach when coupled together with pathways that lead directly to the entrance way. Single doors can be accompanied by overlights or sidelights to make the entrance way more inviting and provide a greater sense of decoration. Security is less of a problem with strong aluminium doors which are more secure than traditional wooden doors.

Entrance doors can be a different colour to the window and door joinery with dark colours often picked to compliment roof colours. Bright colours are also available. There are a number of hardware options to select from.

Door: SR16  
Colour: Karaka Matt

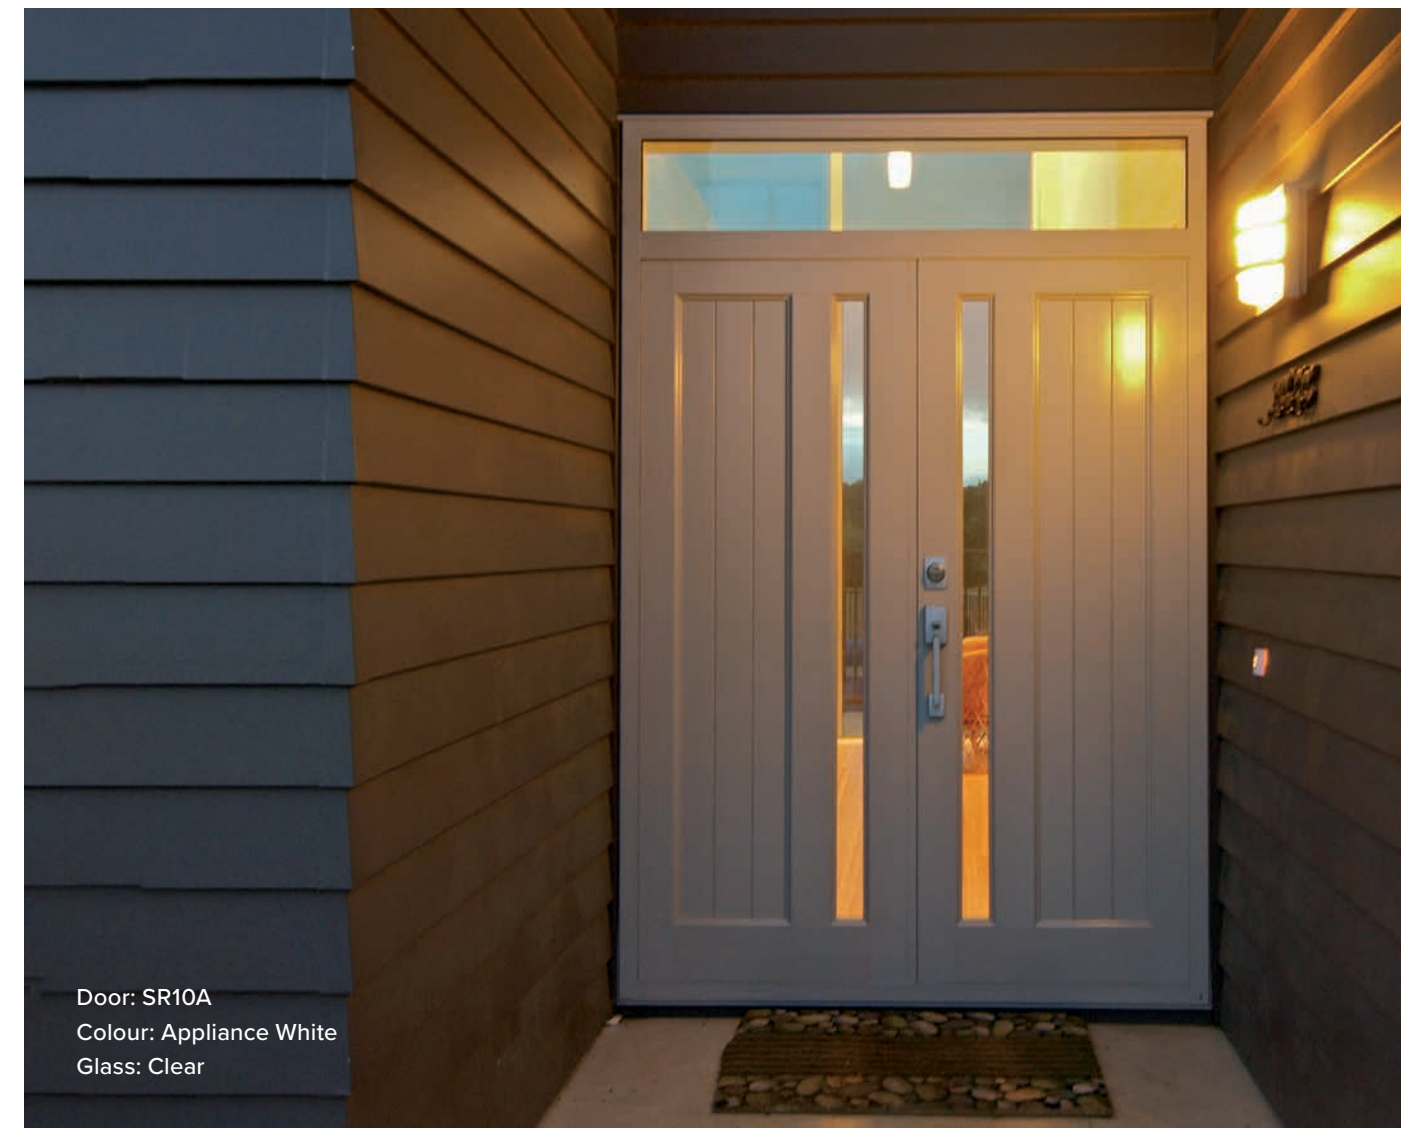

# Double Doors

## Grandeur Entrance

Double doors help create a feeling of grandeur by visually adding greater dimension and substance to a building.

Coupled with sidelights and overlights, these double **Stellar Doors™** create an impressive entrance way. Double doors are very practical for home owners who do a lot of entertaining or when the foyer or front access benefits from a wider space. Typically the doors open in and there are advantages in having a protected area for visitors to wait and shelter from the elements.

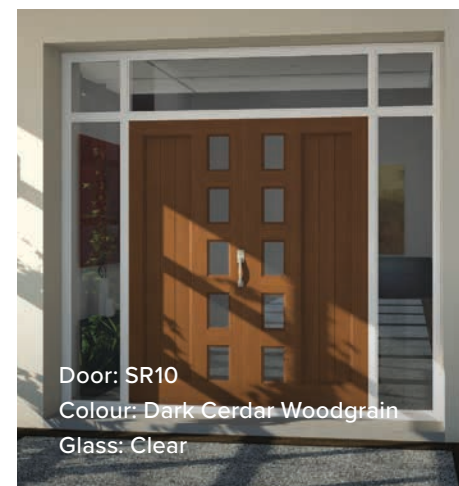

Door: SR10A  
Colour: Appliance White  
Glass: Clear

# Sidelight and Overlight Panels

## Customise light Panels

Incorporating a sidelight or overlight can help to increase the visual impact of an entrance way adding a feeling of luxury, light and space.

# Door Hardware

**Stellar Doors™** are designed to accommodate a range of hardware types, from entrance pull handles, to levers and digital locking devices.

**Stellar Doors™** are powder coated to provide both decorative and protective advantages. A wide range of attractive powder coat finishes are available, including bright finish and textured wood grain finish. Aluminium doors that are powder coated require little maintenance, are long lasting and durable.

Bright Finish Options

**Stellar Doors™** offer six bright colour power coat finishes. Opting for a bright coloured front door makes a stunning statement to the entrance way and home. The intensity colour range from Dulux have a 15 year warranty.

Duralloy® +Plus Contemporary

The Altus Contemporary Collection spans the colour spectrum from subtle neutral tones that blend naturally with New Zealand’s environment, to bold dramatic colours that express individuality – perfect for city style. The range caters to traditional homes as easily as it caters to modern trends in building design.

Duralloy® Plus Urban Collection

These colours are a selection of the latest innovations in powder coating finishes. Created to complement new architectural trends, these shades add a new aesthetic dimension to aluminium joinery with their pearlescent finishes.

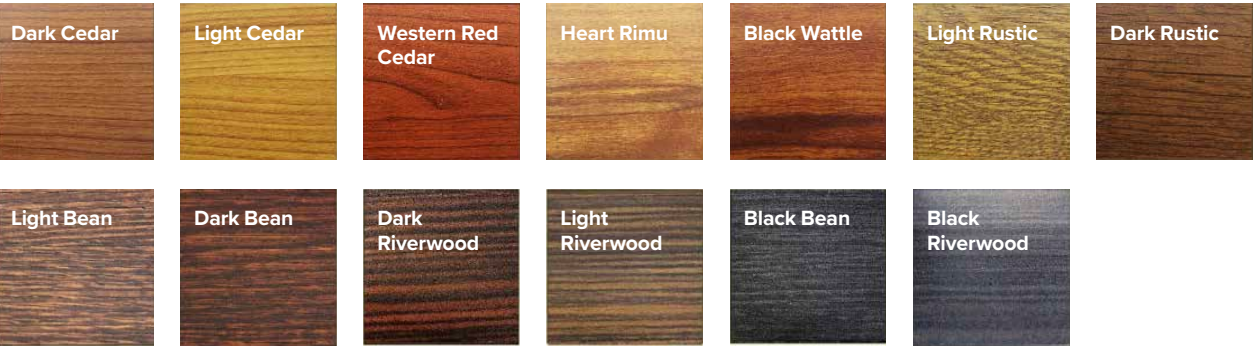

Protecture™

A highly mar and scuff resistant fine textured finish designed to protect. The advanced highly durable powder technology significantly reduces the visible mar and scuffing that happens day-to-day.

Available in a range of popular colours. Ask your local fabricator for a list of available options.

Wood Grain Finish

The latest range of textured wood grain finishes are available to give **Stellar Doors™** the look and feel of timber. This is a practical way of incorporating the timber style with the durability of aluminium.

Can’t find the colour you’re looking for? Please speak to your local Fabricator. Colours may carry a price premium.

## CARE AND MAINTENANCE

Stellar Doors are supplied as a finished product. They require very little maintenance in order to remain looking great for years to come.

## WARRANTY

The colours in the ColourScape™ colour card are warranted through the provision of Dulux® Alumi Shield™ warranties for its Duralloy®Plus™, Protecture™ and Duratec® Intensity® powder coating products on recommended projects, and subject to specified warranty terms and conditions.
